## **Capital District Scanning Analysis**

I left my scanner on for almost two full weeks and let <u>ProScan</u> collect all the recordings. I exported the list of recordings and put that into Excel and made a table showing the most transmissions from each station in that period. Interesting view into what you can hear (and can hardly hear!) in the region.

Here's the Excel file so someone can sort/filter as needed.

Here's a link to all recordings as well.

## Summary

- Scanner activity collected to ProScan, Sept 24 to Oct 6, full database on a Uniden SDS200. During week one the Omni X antenna was selected / week two is using the Diamond D-130N antenna
- I locked out the weather, CB, and some repeater frequencies that paused the scanner unnecessarily (these are well known...)
