

Hi Jock, here are the details on what I mentioned on the Radio Monitoring Net tonight.

The ARRL is asking hams to scan the QR code below to add your name to a petition go have a bill made into law that would protect hams from HOAs who don't want them to have antennas outside their homes. This bill if passed would allow hams to do that. It is a great idea in my opinion.

To send your name to your senators and house reps you just scan the QR code, put your callsign in, and the rest of your info will auto populate (make sure it is accurate) then you hit submit and it sends a letter to the respective representatives and senators. You do NOT need to be an ARRL member to sign up.

Thank you.
